PRESS INFORMATION

Further Dates Announced for Aluminium Rolling Technology Course

Following the success of the Aluminium Rolling Technology Course last November, Innoval Technology announces two further courses for 2007: 14th – 18th May and 12th – 16th November.

The Aluminium Rolling Technology Course is aimed at engineers and managers working in the aluminium production and processing industry. Each course is an action-packed week of over 17 lectures covering topics such as Mechanics of Rolling, Control Systems and Profile Control. Supplementing the lectures are 7 workshop sessions to put into practice the theory taught in the lectures. Half-way through the course the delegates spend a morning at the Jaguar manufacturing plant at Castle Bromwich, Birmingham, to see the assembly of the aluminium-intensive XK car. The delegates also enjoy two social evenings, including a tour around the Hook Norton Brewery and a night playing skittles (a traditional Oxfordshire game).

Innoval Technology has a small-group policy to make sure there is maximum interaction between the course tutors and the delegates, so there will be spaces for only 10 participants on each course in 2007. The organisers urge anyone interested to apply soon in order to secure a place.

For further information please contact Dr. Chris Davenport at chris.davenport@innovaltec.com
