DANIELI FRÖHLING

DANIELI AUTOMATION

World-class aluminium expertise joins forces with world-class equipment manufacturing to produce a new jewel in the aluminium industry's crown

Rolling mill plant manufacturer Danieli Fröhling and sister company Danieli Automation have formed an exclusive agreement with aluminium product and process experts Innoval Technology to bring to market an entirely new range of aluminium rolling mills. The new 'Diamond Mills' are designed from the customer's perspective and represent the cutting edge of equipment technology.

The unique agreement brings together three industry power-houses: mechanical know-how from Danieli Fröhling, process automation expertise from Danieli Automation and aluminium industry expertise from Innoval Technology. Together this group represents more than 500 years of industry experience.

The 'Diamond Mills' team of renowned designers, engineers, physicists and materials scientists is dedicated to improving the rolling process. This group of experts have worked in aluminium plants throughout the world implementing value-adding improvements at all stages from casting through to finishing. They have hands-on experience of the long-term running of these machines, including maintenance issues and trouble-shooting.

By bringing together this exclusive team, Danieli Fröhling combines the best in mechanical and automation with specialist, high productivity aluminium rolling expertise to provide their customers with a support package that is unmatched. The newly designed, optimised rolling concepts that make up 'Diamond Mills' result in a state-of-the-art, high speed, high productivity rolling mill with a rapid, trouble-free start up. This means that customers can start producing world-class product in world-beating time.
