Innoval Technology Launches Technical Support for Industry Investors

Innoval Technology Ltd, an aluminium consultancy based in Banbury, UK, unveils their latest offering in strategic industry support with several new services aimed at investors in the downstream aluminium sector.

As a technical team with world-class industry expertise, Innoval Technology Ltd can now assist investors by providing technical due diligence services and pre-feasibility studies. The company also advises on new equipment purchases and plant design, utilising proprietary cost models to determine economic viability. These strategic services are described in more detail on the company's web site at www.innovaltec.com

Innoval Technology's Managing Director, Dr Tom Farley, comments:

"In the wake of several new smelter projects across the globe, investors are now turning their attention to downstream operations. Innoval Technology has contributed vital technical and market knowledge to several billion dollar projects to date. Because we are an independent company, we are ideally placed to offer these services to investors, many of whom are not familiar with the challenges of the downstream aluminium industry."
