2010 Dates Announced for Aluminium Rolling Technology Course

Following the high demand for places on November's rolling course, Innoval Technology announces another two courses for 2010: 10th – 14th May and 15th – 19th November.

The Aluminium Rolling Technology Course from Innoval Technology covers all the key aspects of hot and cold rolling of aluminium flat products, and is aimed at engineers and managers working in the aluminium production and processing industry. Each week-long course consists of over 17 lectures and workshop sessions covering topics such as Mechanics of Rolling, Control Systems and Profile Control.

The Aluminium Rolling Technology Course has been granted Professional Development status by The Institute of Materials, Minerals and Mining (IOM³). Delegates attending either course can now count it as evidence that they are continuing their professional development.

Innoval Technology has a small-group policy to make sure there is maximum interaction between the course tutors and the delegates, so there will be spaces for only 10 participants on each course in 2010. The organisers urge anyone interested to apply soon in order to secure a place and benefit from the early-booking discount.

For further information please contact Kyle Smith at kyle.smith@innovaltec.com
