## **2012 Dates Announced for Aluminium Rolling Technology Course**

Following eight successful courses in 2011, Innoval Technology announces the dates of their two open courses in 2012: 14<sup>th</sup> – 18<sup>th</sup> May and 12<sup>th</sup> – 16<sup>th</sup> November. Both will take place in Banbury, UK.

The Aluminium Rolling Technology Course from Innoval Technology covers all the key aspects of hot and cold rolling of aluminium flat products, and is aimed at engineers and managers working in the aluminium production and processing industry. Each week-long course consists of over 16 lectures and workshop sessions covering topics such as Mechanics of Rolling, and Control of Gauge, Flatness and Profile.

The Aluminium Rolling Technology Course has been granted Professional Development status by The Institute of Materials, Minerals and Mining (IOM<sup>3</sup>). Delegates attending either course can now count it as evidence that they are continuing their professional development.

Innoval Technology has a small-group policy to make sure there is maximum interaction between the course tutors and the delegates, so there will be spaces for only 10 participants on each course in 2012. The organisers urge anyone interested to apply soon in order to secure a place and benefit from the early-booking discount.
