REGISTRATION FORM

Please select event date: □ 18th-22nd November  □ 25th-29th November 2019

Registration:
To register or confirm your registration please complete the form below for each delegate and send (e-mail, fax or post) to:

Helen Forrest, Innoval Technology Limited, Beaumont Close, Banbury, OX16 1TQ, UK.
e-mail:  helen.forrest@innovaltec.com, fax: +44 (0)1295 702898

Surname (incl. Title)  
First name  
Company or Organisation  
Job title  
Address  

Telephone  
Mobile  
e-mail  
Special dietary requirements

Fees:  £3,850 or £3,500 if registered before 1st October 2019.
UK attendees will have to pay VAT on the course fees.

Please indicate your preferred method of payment:

□ Cheque enclosed, payable to Innoval Technology Ltd.

□ Purchase order: Please invoice my company/organisation at the address below.

Order number  
Name (if different from above)  
Address  

Telephone  
Fax

Important:
Course fees are payable in advance and must be received one month prior to the commencement of the course. Your registration is not confirmed until payment is received. **Any fees not paid in advance will be subject to the higher rate of £3,850.**

Cancellation:
Fees will be refunded, less 10% handling charge, for any cancellation received in writing 14 days prior to the course. For cancellations after this and for non-attendance, Innoval reserves the right to charge the full rate. Substitute delegates are welcome.
The Aluminium Rolling Technology Course presented by Innoval Technology

The course is designed to:

- Help you reduce downtime and improve product quality
- Enable quicker solving of rolling process problems
- Give an in-depth understanding of the fundamentals of aluminium flat rolling

The course comprises both presentation and workshop sessions. The course documentation includes a 750-page colour manual (also provided on a protected electronic format).

We are committed to running the course with a maximum of 12 participants to facilitate a high level of presenter/participant interaction. Here are some comments from previous participants:

“
I really enjoyed this course. The way modules such as vibration and the mechanics of rolling were taught made them really easy to understand. I also liked the close contact with the instructors; they were always available to give us answers, and they have so much industry experience. Finally, it made a real difference for me that the course was focused on Aluminium.

Luiz Alves, Sheet Rolling Supervisor, Alcoa Aluminio S.A.

“
I was particularly impressed by the presenters' effectiveness in conveying some difficult concepts to a diverse group of delegates. I have attended rolling courses before, but none with this level of clarity. The order of the different modules enabled an efficient transfer of knowledge.

Frans Spring, Process Specialist, Hulamin

To register, please complete and return the Registration Form overleaf.

An example timetable is provided below. Please note that our rolling course is currently undergoing a 'refresh' to improve both the content and the experience of our delegates based upon feedback we’ve received. This means that the timetable for the November 19 events will be slightly different to the one shown below. However, all delegates will receive a copy of the improved timetable before the course begins.
