Important:
Course fees are payable in advance and must be received one month prior to the commencement of the course. Your registration is not confirmed until payment is received. Any fees not paid in advance will be subject to the higher rate of £4,100.

Cancellation:
Fees will be refunded, less 10% handling charge, for any cancellation received in writing 14 days prior to the course. For cancellations after this and for non-attendance, Innoval reserves the right to charge the full rate. Substitute delegates are welcome.
The Aluminium Rolling Technology Course
presented by Innoval Technology

The course is designed to:

- Help you reduce downtime and improve product quality
- Enable quicker solving of rolling process problems
- Give an in-depth understanding of the fundamentals of aluminium flat rolling

The course comprises both presentation and workshop sessions. All delegates receive a 750-page manual on a protected USB stick.

We are committed to running the course with a maximum of 12 participants to facilitate a high level of presenter/participant interaction. Here are some comments from previous participants:

“I really enjoyed this course. The way modules such as vibration and the mechanics of rolling were taught made them really easy to understand. I also liked the close contact with the instructors; they were always available to give us answers, and they have so much industry experience. Finally, it made a real difference for me that the course was focused on Aluminium.”

Luiz Alves, Sheet Rolling Supervisor, Alcoa Aluminio S.A.

“I was particularly impressed by the presenters’ effectiveness in conveying some difficult concepts to a diverse group of delegates. I have attended rolling courses before, but none with this level of clarity. The order of the different modules enabled an efficient transfer of knowledge.”

Frans Spring, Process Specialist, Hulamin

To register, please complete and return the Registration Form overleaf.
